

# 30 SITES AND APPS FOR DIGITAL STORYTELLING

Digital storytelling, or telling a story using digital means, is one of the easiest ways to integrate technology into the classroom with almost any subject. T&L blogger David Kapuler recommends the following sites and apps:

### 30hands Learning

Add narration to photos with this fantastic user-friendly iOS app that also has excellent video tutorials.

### Animaker Class

Create animated stories using this excellent site with an educational portal.

### Book Creator

Educators everywhere are using this great mobile (iOS/Chrome) app to create stunning eBooks and digital stories.

### BoomWriter

Students collaborate to create digital stories on this safe site. Completed stories are published online and physical books can be ordered.

### Buncee

The world's leading digital canvas for creating digital stories and more features an educational portal! Educators can track and monitor student progress and assignments.

### Comic Life

This popular iOS app for creating comics is fun and easy to use.

### Digital Nims

Create an animated digital story to embed into a site or blog to share with others.

### Imagine Forest

Use this innovative site to create a digital story or use a story starter for brainstorming.

### Little Bird Talks

This popular site (with an excellent iOS app) allows students to create art and record their voices.

### Make Beliefs Comix

Students can create digital comics in different languages and find lots of educational resources.

### Motion Comics

Users can create animated comics and embed them in a site or blog.

### My Story

This wonderful iPad app enables users to draw or upload a picture, add text and record audio.

### Normal

Use this site to create stunning animated videos.

### Plotall

Organize iPhotos into a story then record audio using this straightforward iOS app.

### Pixton for Schools

This site for creating digital comics features an educational portal.

### Plotagon

On this innovative site users select a character and type a script—Plotagon takes care of the rest.

### Speech Journal

Use this iPad app to pair recorded audio with iPhotos to create a story.

### Sock Puppets

Kids love this iOS app that allows them to lip-synch audio to a sock puppet.

### Story Creator

Create a digital story with this iOS app by syncing audio and photos together. Text can be highlighted during narration to help students with reading.

### Storyboard

On this great site with an educational portal, students create art-inspired stories and embed them into a site or blog.

### StoryKit

Tell a story by adding text, photos, and audio in this easy-to-use iOS app.

### Storyboard That

Teachers are using this site, which has an educational portal, in a wide variety of ways.

### Story Jumper

Build a story from scratch or choose one of the story starters, then add objects, text, and art.

### TakeStory

Collaborate with others and tell a story through audio, images, and video.

### Strip Designer

This iOS app for creating digital comics is similar to Comic Life.

### Tellagami

Tell a short story by creating an avatar and recording audio.

### ToonDoo Spaces

This is a great site, with an educational portal, for creating digital comics.

### VoiceThread

Create an interactive digital story by uploading multimedia content and recording an audio narration. A finished VoiceThread can be embedded into a site or blog.

### Zimmer Twins

Create animated movies/stories on this fun site featuring an education portal.

### WriteComics

Tell a story with a digital comic on this easy-to-use site.
